

### 1. Recent situation of VE Market

Recently, the 50% feed grade Vitamin E market has been stable. The transaction price in the Chinese market is around \$13.5, the export price is about 10.8 to 11 dollars, and the local price in Europe is 10.5-11 Euros, down about 0.3-0.4 Euros compared with the previous week. Recently, the market demand for vitamin E is average, but the overall price is stable, but some factories have said they plan to increase the price, It is expected that the market will be stable in the near future, and it is not ruled out that some suppliers will raise prices to drive the transaction.

### 2. The impact of Tonga volcanic eruption on fisheries.

Peru on the 17th local time, Peru's national civil defense Bureau said in a statement that Tonga volcanic eruption led to an "abnormal wave" along the country's coastline. As a preventive measure, the country will temporarily close 80 ports. It also called for a moratorium on port and fishing activities. As of recently, this season's fishing in central and northern Peru has been officially announced. In 2021, the fishing quota in central and northern Peru for the next season was 2047000 tons, the actual fishing volume was 2007539 tons, the remaining quota was 39461 tons, and the proportion of completed quota was 98.07%. The fishing in southern Peru in the last quarter of 2022 was just at that time. After the eruption of Tonga volcano, 80 ports in Peru were closed. Obviously, the fishing in the South was directly affected. According to the small statistics, there was no harvest in these days. Due to the shortage of raw materials, the rising market price of fish oil is an inevitable trend.

3, 2021 plant extracts from hot export varieties.

According to the data of 2021, China's export of plant extracts was 51600 tons, a year-on-year increase of 6.5%, and the total export was US \$1.378 billion, a year-on-year increase of 9.0%. Among them, stevia extract, eucalyptus oil, menthol, marigold extract, pepper extract, citrus young fruit extract, blueberry extract, rutin, Ginkgo biloba extract and silymarin extract are still hot export varieties of plant extracts, accounting for more than 50% of the export of extracts.

4, Epidemic related products are still in short supply.

As the situation of COVID-19 is still grim, market demand for some products related to the epidemic continues to rise and prices rising rapidly, such as rutin, quercetin, and it will not go down in a short time.
